EXTRA FLEXIBLE STAINLESS STEEL GROUND STRAPS

Multiple strands of type 304 stainless steel wires conforming to MIL-W-423. Ring terminal are manufactured from high strength steel alloy, electro-tinned plated for maximum conductivity with low contact resistance. Used for high temperature applications up to 482 deg. C continuous. Provides high mechanical strength and excellent corrosion resistance..

Add length in inches (hole to hole) after part no.

All dimensions are nominal.
